

## **5.0 Consultation and Coordination**

### **5.1 Public Involvement**

On August 31, 1995, a notice was sent to the public, media, agencies, and other organizations on the BLM California Desert District mailing list (about 6,000 names), describing the purpose of interagency planning covering issues within the NEMO planning area. On September 5, 1995, a Notice of Intent announcing the beginning of the planning process and EIS was published in the Federal Register.

Public workshops were held from September 21 through 27, 1995 at Pasadena, San Bernardino, Barstow, Baker, Needles, Ridgecrest, Independence, Lone Pine, and Furnace Creek, California, and in Las Vegas, Nevada. About 250 people attended the workshops. These workshops were used to identify issues and concerns to be addressed in the National Park Service management plans, CDCA Plan amendments, and accompanying EIS documents for the area. These public workshops were augmented by interagency scoping workshops to identify cross-jurisdictional and other issues of concern.

Ten additional public workshops were held from April 14 through 24, 1997 at the same locations as stated above. About 330 people attended the workshops. These workshops were used to identify alternative management approaches to be addressed in the EIS.

In August 1998, BLM held additional public meetings to clarify the proposals and ask for any additional issues, alternatives, or concerns, not presented in earlier scoping meetings, and present the framework for a desert tortoise conservation strategy developed that spring. The scoping process was concluded in Nov 1998.

Comments have been grouped together under the planning goals and issues to assist readers in identifying the issues that are of primary concern to them. Many of these categories reflect the various environmental resources that may be used to organize the analysis in the EIS, such as biological, cultural, and wilderness. Other categories were created to reflect the nature of the comments received.

#### **5.1.1 Planning Process**

Objectives were generated for each element of the CDCA Plan to analyze the current management situation and develop proposals and alternatives that address specific resource and scoping issues. The BLM developed a tentative package of candidate CDCA Plan amendments based on the scoping process. Additional public input on alternatives was sought at public meetings. Based on these meetings and subsequent staff input, additional proposals and alternatives were developed for consideration, and existing proposals were further refined. Once proposals and alternatives were preliminarily developed, an interdisciplinary meeting was held to integrate proposals and alternatives.

#### **5.1.2 Issues Summary**

BLM received a rich array of comments during the scoping comment period. Because the purpose of scoping is to present issues and ideas for consideration by the preparers of the EIS, it is more important to capture what has been expressed rather than how often. Consequently, a summary table has been prepared to represent the breadth and variety of comments, not their frequency.

As required by CFR 1501.7 for implementing NEPA, BLM has used the scoping process to determine the scope of issues to be addressed in the NEMO EIS. In addition, BLM land-use planning regulations at 43 CFR 1610 were also used to guide the determination of the scope of the NEMO planning effort.

Issues that are outside the NEMO planning effort fall into five categories:

1. Issues that are not directly related to the implementation of the California Desert Protection Act
2. Issues that can be adequately addressed under current land use planning mechanisms without the need for additional planning
3. Issues that are larger in scope than the NEMO planning area and which can be better addressed at another level (e.g., CDCA-wide)
4. Issues concerning Congressionally designated boundaries and land uses
5. New issues that necessitate additional plan amendments. Amendment proposals submitted after November 1997, will be considered in a subsequent amendment process

Issues that are within the scope of the NEMO planning effort are ones that deal directly with the conservation of the Desert Tortoise or the CDPA and fall into four categories:

1. Issues affecting public lands transferred from BLM to NPS and their relation to the California Desert Conservation Area Plan (CDCA Plan).
2. Issues affecting public lands no longer considered for wilderness designation.
3. Issues affecting public lands where threatened and endangered (T&E) species conservation and recovery is required. The latter is a result of the 1989 listing of the desert tortoise over a broad area of the southwest deserts and subsequent development of a recovery plan.
4. Issues that have emerged from scoping that are not adequately addressed in the current land-use planning documents and decisions.

Major issues that emerged as a result of the planning process and scoping are outlined in Section 1.3 of Chapter 1. Issues and comments that were within the scope of the NEMO planning effort are grouped into categories by resource.

Table 5.1 lists by category the issues, comments, and concerns gathered during the scoping process and whether they are within the scope of the planning process.

Over a thousand comments were received from the public as a result of the hearings. The BLM contracted with the USFS to analyze the comments, in terms of subject material and response types needed. BLM NEMO team responded to over 400 public comments on a generic basis and the responses are located in Appendix U. Where substantive comments were received, the text of the EIS reflects the comments.

## **5.2 Interagency Coordination and Consultation**

### **5.2.1 National Park Service**

Interagency coordination with the National Park Service was essential at key phases during the planning process and on specific cross-jurisdictional issues. Early in the planning process, joint public and interagency scoping meetings were held to identify issues for consideration. Joint newsletters were utilized to keep the public apprised of progress in both agencies' planning efforts, including key dates.

Interagency meetings were held throughout the development of the range of alternatives on crosscutting issues, such as joint biological team meetings, which identified and addressed potential coordination needs. The most important cross-jurisdictional issue in this document is the recovery of the East Mojave population of the federal and state threatened desert tortoise. The strategies BLM has identified can meet recovery goals only if the Mojave National Preserve also adopts recovery strategies. Several of these strategies are expected to require continued interagency coordination and consultation on a local and regional level to be successfully implemented.

### **5.2.2 U.S. Fish and Wildlife Service**

#### **Endangered Species Act Consultation on CDCA Plan, as amended.**

The Congress specified that the purposes of the *Endangered Species Act of 1973* (Public Law 97-304), as amended, (ESA) "...are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of such endangered and threatened species, and to take such steps as may be appropriate to achieve the purposes of the treaties and conventions..." (Sec. 2(b)). The ESA states it "...to be the policy of the Congress that all federal departments and agencies shall seek to conserve endangered species and threatened species and shall utilize their authorities in furtherance of the purposes of this Act." (Sec. 2(c)(1)) The fulfillment of these purposes is a fundamental issue in this planning effort.

The ESA further provides that "Each federal agency shall, in consultation with and with the assistance of the Secretary, insure that any action authorized, funded, or carried out by such agency is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat of such species..." (Sec. 7(a)) By federal regulations (*Code of Federal Regulations, Volume 50, Part 402*) implementing the provisions of Section 7 of the ESA, the BLM and other Federal agencies must *consult* with the USFWS on projects, plans, and actions that may negatively affect a threatened or endangered species. The USFWS then issues a Biological Opinion relative to jeopardy and adverse modification. A similar review referred to, as a *conference* is required for species that are proposed for Federal listing.

Previously, consultations were not conducted on land use plans, such as the CDCA Plan. Recently, the courts have determined that consultations are required on land-use plans. Therefore, as a part of this planning process, the BLM has formally consulted with USFWS on the affects of the CDCA Plan in the NEMO Planning Area as modified by the NEMO plan on threatened and endangered species.

The BLM has determined that the following federally listed species occur on BLM lands in the NEMO planning area and potentially may be affected by the CDCA Plan and/or the NEMO plan amendments:

- Desert tortoise (threatened) and critical habitat,
- Inyo California towhee (threatened)
- Southwestern willow flycatcher (endangered),
- Least Bell's vireo (endangered),
- Amargosa vole (endangered) and critical habitat,
- Ash Meadows gumplant (threatened) and critical habitat, and
- Amargosa niterwort (endangered) and critical habitat.

This Plan and Draft EIS together with a CDCA Plan edited with amendments and various other supporting documents (e.g., *Current Desert Tortoise Management Situation in Northern and Eastern Mojave Planning Area*) provided the necessary information to conduct the consultation.

On February 27, 2002, the USFWS issued a biological opinion (No. 1-8-01-F-18) addressing the effects of the CDCA Plan and NEMO amendments on the Amargosa niterwort and Ash Meadows gumplant (see Appendix V), and on June 17, 2002, a biological opinion (No. 1-8-01-F-16) addressing the desert tortoise and its critical habitat was delivered (see Appendix W). Biological opinions for the other species are pending.

### **Programmatic Consultation on Desert Tortoise**

The BLM currently has a number of Biological Opinions (BO) from USFWS that cover a group of activities or programs. Such Biological Opinions are referred to as *Programmatic Biological Opinions*. Each BO covers only the species addressed in the consultation. In the NEMO Planning Area, the BLM currently has four BOs addressing desert tortoise for small mining operations (under 10 acres), small disturbances (under 2 acres), cattle grazing, dual-sport motorcycle events, and illegal dump clean-ups (San Bernardino County only). Many other biological opinions cover individual projects on a case-by-case basis.

The BLM also proposes to obtain a *programmatic* biological opinion for desert tortoise on projects that may be proposed in the future. Standard mitigation measures are presented in Appendix A for application on these projects to mitigate for impacts and to compensate for residual impacts to its habitat after mitigation. Further formal consultation would not be required for covered projects, but a reporting and review process by USFWS is included. The programmatic BO will also specify an allowable *incidental take* (i.e., incidental to an otherwise legal activity) for the CDCA Plan and for covered projects. The programmatic consultation will not cover the following:

- Projects that disturb more than “n” acres (where “n” = 50, 100, or 200 depending on the alternative)
- Projects that require an EIS
- Projects that require a CDCA Plan Amendment

### **5.2.3 State Historic Preservation Office (SHPO/CA-SHPO)**

State Historic Preservation Office consultation has been initiated consistent with Section II C of the state protocol agreement between BLM and SHPO for the NEMO planning area. SHPO was requested to provide comments on issues and alternatives specific to historic and prehistoric properties in the planning area. Information received has been taken into account in our analysis and decision making process. Impacts to cultural resources are also considered in the context of the National Environmental Policy Act, and measures are taken to avoid or mitigate impacts, where appropriate.

### **5.2.4 Other Bioregional Planning**

Coordination between the NEMO, West Mojave and NECO planning efforts has taken place to address consistency in cross-jurisdictional issues for planning throughout the California Desert District. These three-plan coordination meetings have been occurring since scoping was completed. The NECO Planning Area is twice the size of NEMO, and is adjacent to NEMO, south of I-40. NEMO and NECO share adjoining boundaries of extensive desert tortoise habitat across I-40. NECO's habitat is in two other desert tortoise recovery units. The WEMO planning area is about four times the size of NEMO and abuts NEMO on most of the western boundary of the planning area. Desert tortoise conservation and recovery and competitive sport speed events are major cross-jurisdictional coordination issues.

## **5.3 Native American Consultation**

Federal consultation for the NEMO planning area was initiated in 1997, and culminated in a meeting attended by Fort Mojave, Chemehuevi, and Timbisha tribal representatives to provide comments and concerns regarding religious, heritage values, or traditional properties that they may have information on which may be affected by the planning effort. The Timbisha tribe had also concurrently initiated a focused and separate planning effort to address the issue of provision and administration of tribal lands, including portions of the NEMO planning area. Issues identified at the July 1997 meeting for consideration during analysis included the following:

- Assure tribal vehicle access to public lands and give tribes special consideration;
- Gives tribes timely notification of burials and the opportunity to participate in burial location;
- Identify sacred sites more specifically by tribal affiliation;
- Evaluate the potential for loss of water from future development;
- Thoroughly analyze any potential use of the planning area for radioactive waste
- Consider leaving human remains in place.

Additional letters were subsequently sent out to these tribes, and to the Las Vegas Piutes, requesting further comment on the planning effort. Information received has been taken into account in our analysis and decision-making process.

**Table 5.3 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
<b>1. Cultural Issues</b>			
Any MUC boundary changes needed	Cultural Issue 1: Need for management zoning adjustments.	Y	MUC Amendments proposed.
Establish policies for the preservation, protection, interpretation and the appropriateness of revealing the locations of cultural resources.	Cultural Issue 2: Adequacy of existing CDCA guidance for cultural resource management.	N	Already addressed in existing planning documents and Bureau Policies: Administrative workload issue.
Is our protection strategy for cultural sites adequate? Of particular concern are those identified and accessible to the public, i.e., identify, those that should be nominated, schedule nominations, and determine contributing portions upon identification.	Cultural Issue 3: Need to keep management options open for problem areas needing reclamation.	N	Already addressed. Where not on the NRHP, addressed with site-specific analysis when identified.
Distinguish between historic abandoned mine sites that need protection and sites that are providing garbage dumping grounds and safety hazards.	Cultural Issue 4: Need for protection of cultural resources in wilderness.	N	Outside scope: May be addressed in future wilderness management planning.
SB management. Will BLM Destroy historic structures?	Cultural Issue 4: Need for protection of Native American sites.	N	May be addressed under existing guidance, using separate consultation and agreement with Native American tribes.
How do we deal with historic ROW and ways in wilderness?	Cultural Issue 5: Need for more systematic and proactive approach to protection and/or documentation of significant (including NRHP eligible) properties.	N	Beyond scope of this plan: T&E and CDPA focus. Also admin/workload issue. Importance of many sites already established through previous planning documents.
Have we addressed and is our protection strategy for Native American Tribal sites adequate?	Cultural Issue 6: Need for additional site-specific management strategies.	N	Beyond the scope of this plan: T&E and CDPA only.
Need to develop a strategic cultural program (beyond ad hoc and reactive focus) e.g. mitigation caching and other creative methods to meet goals, long term strategies for surface objects, and to gather and assess historical context.			
Need to follow through on National Register process.			
How do we deal with potential impacts to features that are historically significant at the time of designation i.e. mines, rights of way, ways and structures.			
PSkr <sup>1</sup> Identification on ground, map, interpretation and documented history. 20 Mule Team Wagon Road through Death Valley floor and Panamint Mountains.			

**BLM CDD**  
**NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination**  
**Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
NePS <sup>2</sup> / PSkr <sup>1</sup> : Address ID, Interpret and possible restoration of some cultural, significant cultural resources (T&T, Patton Military sites, WPA Guzzler sites, trails, cultural landscapes, Dinosaur Trackway.			
AC11 <sup>3</sup> : Where do the Mojave Road, T&T RR grade and other eligible properties retain integrity, what is the proper historical designation and is there a need for restoration?			
NePS: I.D. Cultural elements to be restored such as certain features along Historical Route 66.			
Do we adequately manage significant linear historic features across jurisdictional boundaries?	Cultural Issue 7: Coordination Strategies.	N	No specific issues identified. If needed, specific historic features may be addressed in future activity level planning.
<b>2. Native American Element</b>			
AC52: Any MUC Boundary changes needed.	Native American Issue 1: Need for management zoning adjustments.	Y	MUC Change amendments.
NePS: Where/what are the traditional native land uses e.g. Mojave, Chemehuevi, Timbisha, and Shoshone?	Native American Issue 2: Adequacy of existing CDCA guidance for Native American resource management.	N	Already addressed in existing planning documents and Bureau policies.
NePS: How should areas with Native American spiritual values be managed (e.g. Public access)?	Native American Issue 3: Need for additional site-specific management strategies.	N	Beyond the scope of this plan: T&E and CDCA focus.
Is Native American rock art being adequately protected and interpreted?	Native American Issue 4: Coordination Strategies.	N	Coordination and consultation will occur. Affects not anticipated at this time. If any proposals and alternatives affect Native American sites or access additional coordination will occur.
<b>3. Wildlife Element</b>			
AC52: Any MUC Changes Needed	Wildlife Issue 1: Need for management zoning adjustments.	Y	MUC change amendments.

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
AC2, Pssgm, AC3, AC8, FWS addressed recovery objectives for the Desert tortoise established in the recovery plan & designate DWMA's. Develop a management strategy for DT in the wildlife management area.			
PSmt: Do cost/benefit analysis of DT protection measures – focus on effective measures with best B/C ratios.			
AC6: Minimize habitat fragmentation.			
AC19: Consider design of additional RNAs for DT/habitat.	<b>Wildlife Issue 2:</b> Need to address Desert Tortoise listing / recovery.	<b>Y</b>	Plan Amendments and Desert Tortoise Conservation Strategy are addressing specific issues.
PSsgm: Include a large portion of Ivanpah Valley in DT Management area; Cima Lava fields are not best DT habitat.			
AC9: How will forage be allocated, in particular in DWMA's?			
AC13: What are standards to determine if research proposals in DT recovery areas are appropriate?			
AC19: Consider design of additional RNAs for tortoise habitat within grazing allotments and possibly within open areas.			
Pssgm: Include portions of Lava field in DT Management area			
AC9: Per BO.			
AC13: Initiate study on grazing impacts to desert perennial grasses.			
SBmtg: High quality DT habitat should be assessed by vegetative correlation.			
PasMtg: Address fencing for DT.	<b>Wildlife Issue 2:</b> Continued	<b>Y</b>	See Above
PasMtg: DT recovery, How will we know when we get there? – How long is DT recovery – What comes next when recovery is achieved? – Did you identify impacts to DT from raptors and other birds e.g. Raven predation and develop strategies to manage these impacts?			
Consider strategies that provide economic incentives to protect DT.			
What effects will the Ivanpah airports have on the area?			
Include public education on land ethics			
AC7: Implement DT and Mojave Tui Chub recovery plans.	<b>Wildlife Issue 3:</b> Need to Address other T&E protection / Recovery	<b>Y</b>	Where T&E are found to occur, ACECs are evaluated.

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
NePS: Also Amargosa Vole recovery plan.	<b>Wildlife Issue 4:</b> Need to address other sensitive species protection.	<b>Y</b>	MUC Change Amendments.
AC1, AC15, PSSgm: Develop a management strategy for other sensitive species and areas of species richness to maintain and protect (Habitat VS Species planning).			
AC4: Plan mining activities and mine reclamation strategies that promote and protect bat populations.			
PSsgm: Evaluate the potential to restore native species (Pronghorn antelope, wolf).	<b>Wildlife Issue 5:</b> Need for restoration of native species and elimination of exotics.	<b>Y</b>	Addressed only in the context of T&E species. ACEC proposals.
Pske: Remove all exotic species including Chuckler partridges.			
PSsgm: Reexamine guzzlers as a viable wildlife management tool before installing, maintaining additional guzzlers, include impacts on DT and native / non-native species	<b>Wildlife issue 6:</b> Need for additional guidance on guzzler management	<b>Y</b>	To the extent it is an issue for DT conservation, it is addressed in this planning effort. Wilderness issues addressed through separate wilderness planning & policy annexes.
Psfw: Ibid in wilderness areas unless they are important biologically and can be maintained w/o vehicles.			
Pskd: Maintain CDFG access to guzzlers including wilderness.			
AC33: Provide long-term watershed strategy for Amargosa Pupfish and other species	<b>Wildlife issue 7:</b> Need for additional site-specific management strategies	<b>Y</b>	Part of the ACEC proposal for Amargosa.
Psiw: Need baseline studies of wetland ecosystem, desert fishes, spring snails, and associated inverts. Populations should be maintained at 100% of potential			
<b>4. Vegetation Element</b>			
AC52: Any MUC Boundary changes needed?	<b>Vegetation Issue 1:</b> Need for Management zoning adjustments.	<b>Y</b>	MUC amendment proposals.
Pssgm: Identify unique or UPA in planning area (e.g. red gramma grasslands, white fir forests) & protect more pristine areas with populations.			
AC31: Populations of white fir and others on “Sky Islands” need special attention and additional study	<b>Vegetation issue 2:</b> Need to address specific sensitive habitat / recovery	<b>Y</b>	ACEC proposal for T&E. Some of the White Fir population is included in one of the ACEC expansion proposals
Neps: Dolomite formations also host many endemic plants and should be evaluated			
Pssh: Protect old growth vegetation (e.g. Yuccas) from damage			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
AC4: To what extent is type conversion occurring? What effect does fire mgt strategies have on this?	<b>Vegetation issue 3:</b> Need for restoration of native species and ecosystems and elimination of exotics.	<b>Y</b>	To the extent that these are issues for DT conservation. May be addressed subsequently in other ACEC management plans if designated.
Peswc: Protect and recover native biodiversity			
NePS: Consider options for controlling exotic species.			
Pssgm: Consider Vegetation restoration of lands (abandon, developments, like mines, homesteads, corrals)			
AC3: Evaluate impacts from GW depletion on habitat health. What is the threshold of draw-down and what can be done to help conserve water dependant habitats?	<b>Vegetation issue 4:</b> Need to protect riparian / wetland habitats	<b>Y</b>	Indirectly addressed through watershed ACEC proposal. Specific strategies and impacts would be evaluated subsequently during ACEC management planning.
<b>5. Wilderness Element</b>			
AC52: Any MUC boundary changes needed? (e.g. areas released that are default MUC L)	<b>Wilderness issue 1:</b> Need for management zoning adjustments	<b>Y</b>	MUC amendment proposals for “released” lands no longer under wilderness review
AC2: Identify and designate specific access points and/or staging areas horse loading, hunter and hiker parking.	<b>Wilderness issue 2:</b> Need for additional facilities at wilderness boundaries.	<b>N</b>	Addressed under separate wilderness planning process.
AC22: Identify and recommend needed boundary adjustments.	<b>Wilderness issue 3:</b> Need for wilderness boundary adjustment recommendations.	<b>N</b>	Addressed in a separate process for each wilderness.
AC6, AC3, NePS: Consider recommending amendment of CDPAs to allow motorized use of the “Heritage” trail or rerouting trail. Are there other well used trails with breaks due to CDPAs that we should address?	<b>Wilderness issue 4:</b> Need to amend wilderness use parameters.	<b>N</b>	Outside the scope of T&E conservation or CDPAs implementation and coordination. May be addressed in separate process for each wilderness.
Pssh: Boundary adjustments are inappropriate as part of this planning effort			
Identify minimum requirements for access in wilderness.	<b>Wilderness issue 5:</b> Need for wilderness guidance clarification.	<b>N</b>	Addressed through separate wilderness planning & policy annexes.
AC4, AC^AC10: Provide access to private lands & authorized activities (e.g. grazing, utilities, valid mining claims) in wilderness.	<b>Wilderness issue 6:</b> Need for access to private lands & permitted activities.	<b>Y</b>	Addressed in route designation strategy for DT critical habitat.
?*: What degree/type of access? (refer to CDPAs).			

**BLM CDD**  
**NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination**  
**Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
NePS: Address wilderness Mgt. Guidelines re: Maintenance and installation of big and small game guzzlers.	<b>Wilderness issue 7:</b> Define what does/does not promote wilderness values.	N	Outside the scope of this planning effort.
? : What is our fire management strategy in wilderness?			
AC82: What is the policy on tagging wildlife or similar research-related practice?			
AC32: What additional steps should we take to protect the scenic quality of visitor use corridors?			
AC6: I.D. and protect high visual quality viewsheds including those from highways (e.g. from billboards, signs). Should we relocate sand & gravel pits away from wilderness viewsheds?	<b>Wilderness issue 8:</b> Need for additional guidance to protect/maintain scenic resources.	N	Outside the scope of this planning effort.
AC30, PSSgm: Look at noise and visual Mgt. Strategy, with emphasis on (reducing) low-level aircraft and artificial light sources.			
AC10: What visual reclamation standards should we use for mining disturbances?			
AC11: To what degree do we plan to reclaim closed routes?			
PSSgm: Reduce plane contrails over wilderness.			
AC4: Is our existing hiking trail network adequate (more, less, OK).			
AC2: Should camping areas in wilderness or no camping zones along open routes be designated?	<b>Wilderness issue 9:</b> Need for additional recreation management and guidance.	N	Outside the scope of this planning effort. Specific wilderness planning is a separate process.
AC3: Should we look at permitting and/or group size limits?			
AC20: Should there be additional restrictions on campfires in wilderness?			
? : What are our route signage needs?	<b>Wilderness issue 10:</b> Need for public information and enforcement strategy.	N	Outside the scope of this planning effort. Specific wilderness planning is a separate process.
? : Providing information to the public on and enforcement of route designation decisions.	<b>Wilderness issue 11:</b> Coordination strategies.	N	Outside the scope of this planning process.
? : How can travel corridors through gateway communities compliment the goals and missions of adjacent federal land while gaining economic benefits to the communities? Joint marketing strategies.			

**BLM CDD**  
**NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination**  
**Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
<b>6. Wild Horse and Burro Element</b>			
AC52: Any MUC/boundary changes?	<b>WH&amp;B issue 1:</b> Need for management zoning adjustments.		<b>Y</b>
NePS: Determine appropriate management policies for each area/sub-unit.	<b>WH&amp;B issue 2:</b> Need to amend element in specific areas.	<b>N</b>	Separate strategy being developed to evaluate herd size using a 5 year monitoring strategy.
Pssh: Immediately reduce burro populations to the BLM HMA levels in new NPS areas. Plan to zero out these populations within NPS lands.	<b>WH&amp;B issue 3:</b> Adjust exclusion areas to protect riparian resources.		
Psnw: Protect WH&B where they were identified as existing in 1971.			
Pssgm: Exclude WH&B from naturally occurring surface waters but maintain access to Big Horn.	<b>WH&amp;B issue 4:</b> Coordination strategies.	<b>N</b>	Can occur as needed under existing management.
AC: Develop joint management plans for WH&B populations in areas that cross-jurisdictional boundaries.			Being pursued in a separate strategy.
<b>7. Range Management and Livestock Grazing Element</b>			
AC52: Any MUC Boundary changes needed?	<b>Range issue 1:</b> Need for management zoning adjustments.	<b>Y</b>	Boundary / herd size changes proposed as a result of the CDPA.
Pssh, Psgb: Revise boundaries of Lacey-Cactus- McCloud & Eureka Valley allotments so they do not include portions of DVNP. Reexamine grazing levels as appropriate.			
Psrh: Livestock should be allowed to graze inside the drift fence on hunter MT.	<b>Range issue 2:</b> Need to amend element in specific areas to meet DT recovery goals.	<b>Y</b>	Alternatives considered for DT conservation strategy.
AC5: Need to adjust grazing preferences due to changes in resource mgt goals in DT Wildlife Management areas.	<b>Range issue 3:</b> Adjust exclusion areas to protect riparian resources.	<b>N</b>	May occur under existing management.

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
? : Provide guidance for improvements in wilderness (refer to CDPA as appropriate)	<b>Range issue 4:</b> Guidance/need for improvement in wilderness.	N	Outside the scope of this planning effort. Addressed in general BLM policies, the CDPA and separate planning annexes.
? : Avoid duplication of services between communities and Federal lands.			Addressed for DT conservation and where single allotments have been split. Other issues are outside the scope of this planning effort. Can be addressed through existing management and/or subsequent activity level planning.
? : Joint Management of any facilities with NPS.	<b>Range issue 5:</b> Coordination strategies.	Y	
NePS: Consider establishing carrying capacities and a planning area wide permitting system for heavily used areas.			
G: How can we coordinate signage, structures and services to meet visual goals, provide positive image of agencies.			
<b>8 Recreation Element</b>			
AC52: Are any MUC boundary changes needed?	<b>Recreation issue 1:</b> Need for management zoning adjustments.	N	Outside the scope of this planning effort. Not DT conservation or CDPA focused.
? : What if any, additional visitor service / facility should be provided and where – Federal Lands, communities?			
Psea: No additional facilities	<b>Recreation issue 2:</b> Need for additional facilities.	N	Outside the scope of this plan.
AC27: Identify measures to deal with disability access			
AC5: Do we need to identify and develop additional water sources (e.g. at trailheads)			
AC4a, AC7: Develop a strategy for non-motorized recreation in particular Mtn. Biking and horse trails.			
NePS: Address adequacy of trailhead parking, especially for wilderness areas, maintenance of, number and length of trails and need for single or multi-use trails bicycles, hikers and equestrians.	<b>Recreation issue 3:</b> Need for additional non-motorized recreation strategy.	N	Outside the scope of this planning effort.
NePS: Address various recreational opportunities including hang gliding, trail bicycles, and rock hounding.			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
F: Where can we anticipate increased use and how can we work with private sector to provide touring, filming- commercial and recreational.			
AC1: Do we need to develop a strategy to bring commercial tour activities under permit?	<b>Recreational issue 4:</b> Need for additional recreation management. Strategies.	N	Outside the scope of this planning effort. They are not DT conservation or CDPA driven. Existing strategies are adequate. Shooting may be addressed in the context of the DT Conservation Strategy.
AC2, AC6: What can we do to prevent decorative rock collection. Will restricted access in wilderness put additional pressure on existing collecting areas?			
AC6: Do we need to permit uses that are higher risk, such as rock climbing?			
NePS: Address the issue of recreational shooting/ plinking in the preserve. (Also a BLM issue).			
AC20, NePS: Should we develop a policy on firewood and campfires on public lands based on sensitive resources and/or fire management policies.	<b>Recreational Issue 5:</b> Need for additional camping guidance.	Y	Addressed in DT conservation only. Other issues are outside the scope of this planning process.
NePS: Look at policies on roadside camping, particularly in wilderness.			
Pema: Consider adding no additional camping restrictions.			
NePS: Identify alternative areas for recreational opportunities no longer permitted in wilderness.	<b>Recreational issue 6:</b> Need for alternative for specific recreational opportunities.	N	Outside the scope of this planning process. Wilderness designation was anticipated and considered in CDCA Plan and a part of broader consideration of recreational opportunities.
? : How can travel corridors through gateway communities complement the goals and missions of adjacent federal land while gaining economic benefit to the communities? Joint marketing strategies?	<b>Recreational issue 7:</b> Coordination strategies.	N	Outside the scope of this planning effort.
<b>9. Motor Vehicle Access Element</b>			
AC52: Any MUC boundary changes needed?	<b>Access issue 1:</b> Need for management zoning adjustments.	N	Effects of any proposed changes on MVA will be evaluated
AC4, AC6: Provide access to private lands, grazing allotments valid mineral claims, particularly in wilderness.	<b>Access issue 2:</b> Need for access for private lands and permitted uses.	Y	Where route designation is occurring, this issue is addressed (i.e. proposed DT Wildlife Management Areas)
NePS: Address access for VER, permitted uses and maintenance of facilities and private lands as well as general public access.			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
PShr: Discuss RS2477 grandfathered rights (re: maintained highways established before FLPMA)	Access issue 3: Consideration of RS2477	N	Outside the scope of this planning effort. BLM policy on RS2477 is addressed at a national level.
C: Is our current route inventory adequate for decisions?			
PSsh: Do not permit jeep tours or any motorized vehicles on closed roads/trails			
Pske: Do not reopen closed routes.			
Psaa: Do not designate any additional routes for vehicle use.			
Psmap: maintain existing accesses.			
AC84: Systematic application of criteria for limits/closures to routes needed.	Access issue 4: General route designation	Y	Addressed as part of the Desert Tortoise Conservation Strategy
PSsh: Eliminate all roads/vehicle trails established after CDCA Plan, unless they have been properly permitted.			
Psa, PSsh, PSsegm: Eliminate unnecessary and environmentally damaging roads and trails, include duplicative trails.			
SBmtg: Will you address roads needed by recreational hobbyist to access remote locations?			
SBmtg: How will you address hunting in the NEMO area?	Access issue 5: Also designate non-motorized routes too.	N	Outside the scope of this planning effort.
AC4a: Look at designation non-motorized (mountain bikes/horse) trails.			
AC7: Look at whether the entire length of Mojave Road and Heritage Trail should remain open to motorized vehicles.	Access issue 6: Site-specific route designations considerations.	Y	Within the scope of the planning effort where located in desert tortoise critical habitat.
Prb, Psce: Mojave Road and Heritage Trail should remain open.			
Pssh, Psfw: The so-called heritage trail is a patchwork of 4WD routes without any historical significance.			
Psfw: Keep the Mojave Road available in its current condition.			
Pssh: Motor vehicle use is destroying most of the historical Mojave Road.			
NePs: Close Ivanpah Dry lake to vehicles (it is closed according to CDCA Plan)			
PSsh: Happy and Surprise Canyons should remain in their present condition and open to provide a challenging 4WD route.			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
PStd: Maintain both a north and south access to Saline Valley Hot Springs.			
Psfw: 4WD track between Eureka and Saline valleys should stay open.			
Neps: Consider maintenance and paving needs as well as opening and/or closing.	<b>Access Issue 7:</b> Need for route improvement and rehabilitation decisions.	N	Administrative actions may be addressed under the existing CDCA Plan and current policies. Rehabilitation strategy will be addressed in DT Wildlife Management Areas.
PSsgm: Restore (rehabilitate) closed routes in the planning area.			
AC2: Should camping areas in wilderness or no camping zones along open routes be designated?	<b>Access Issue 8:</b> Need for additional camping parameters along routes.	Y	Considered in DT Wildlife Management areas only.
? : Provide info to the public on and enforcement of route designation decisions.	<b>Access Issue 9:</b> Need for additional information and enforcement strategies.	Y	Considered in Desert Tortoise Wildlife Management areas only.
? : What are our route signage needs?			
AC6: Consider recommending amendment of CDPA to allow motorized use of the "Heritage" trail or rerouting trail.	<b>Access issue 10:</b> Need for CDPA amendment recommendations on route corridors.	N	Outside the scope of this planning effort.
Pema: Resolve the competitive events issue.			
? : How can travel corridors through gateway communities complement the goals and missions of adjacent federal land while gaining economic benefit to the communities? JointimMarketing strategies?	<b>Access Issue 11:</b> Coordination Strategies.	N	Outside the scope of this planning process.
<b>10. Geological, Energy &amp; Mineral Resources Element</b>			
AC52: Any MUC boundary changes needed?	<b>GEO Issue 1:</b> Need for management zoning adjustments.	Y	MUC amendment alternatives proposed.
PsbI/cp: Revise MUC of Panamint Range from DVNP or adj. BLM wilderness east of the center of the Playa to M (From L).			
PSBl/cp: Revise MUC of former WSA in the Slate Range from L to M.			
AC1: Need for additional segregations given CDPA mineral access limitations.	<b>Geo Issue 2:</b> Need for additional mining restrictions / opportunities.	Y	Considering issue in the context of DT Conservation Strategy development.
Pskr, Psbv, Psrh, Psrcoc: Keep remaining areas available for mining.			
SBmtg: How should we address small mines versus large mines, small disturbances versus more jobs?			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
NePS: Address the impacts from abandoned mines in and near the planning area boundaries, reclaim and revegetation plans and adequacy of existing mitigation measures.	<b>Geo Issue 3:</b> Need for additional reclamation guidance.	N	Outside the scope of this planning effort.
<b>11. Energy Production and Utility Corridors Element</b>			
AC52: Any MUC Boundary changes needed?	<b>Utility issue 1:</b> Need for mgt zoning adjustments.	Y	Changes proposed to the extent existing corridors were affected by the CDPA.
AC31: Designate locations for low power radio transmitters along I-15/40 to provide traveler information.	<b>Utility Issue 2:</b> Need to develop additional com site locations.	N	Outside the scope of this planning effort.
? : Should additional radio sites I-15/40 provide traveler with info on things to do and see in the desert? Who would provide Info?			
<b>12. Land Tenure Adjustment Element</b>			
AC52: Any MUC boundary changes needed?	<b>LTA issue 1:</b> Need for management zoning adjustments.	Y	MUC change amendments proposals.
MUC Changes from L to M in Tecopa area to facilitate exchange out of Federal ownership for isolated tracts.			
MUC change from L to M to facilitate sale of land to Watkins.	<b>LTA issue 2:</b> Need to accommodate future growth.	Y	Addressed in context of the DT strategy or where specific proposals were identified during scoping.
BCSD: Consider making more land available for development.			
AC3: Do we need to look at mod to LTA to facilitate consolidation, exchanges with Cattellus Company, or local needs?	<b>LTA Issue 3:</b> Need for LTA boundary consolidation zone modifications.	Y	Addressed in DT Wildlife Management areas only. Timbisha issue is addressed in a separate planning process.
AC61: Incorporate decisions made on Timbisha Tribal lands.			
NePS: Examine possible land exchanges to consolidate federal lands and recommend boundary adjustments.			
? : Need for additional boundary identification (public, private, agency).			
PSjh: DVNP boundary should follow the Saline Valley road through the east side of Lee Flat and down San Lucas Canyon, as the boundary is not definite and the road boundary would be definite.	<b>LTA Issue 4:</b> Need for clarification of boundaries.	N	BLM- Outside the scope of this planning effort. NPS- is anticipated to address in NEMO planning process.
Psja: Adjust the above boundary to the ridgeline or the road and make other boundary adjustments to exclude valid mining claims.

Table 5.1 NEMO Scoping Comments

Comment	Element & Planning Issue	Within Scope	How Addressed
<b>13A. Support Requirements: Air Quality</b>			
AC52: Any MUC boundary changes needed?	<b>Air issue 1:</b> Need for management zoning adjustments.	<b>Y</b>	Addressed in Desert Tortoise critical habitat only
AC25: Identify and designate PSD area.			
NePS: Address AQ within planning area.			
PSsgm: Evaluate the effects of soil disturbances, groundwater pumping and wind erosion on air quality.	<b>Air Issue 2:</b> Need for additional site-specific management strategies.	<b>N</b>	Outside the scope of this planning effort. Plans already exist for non-attainment areas with air quality standards.
NePS: Discuss fuel dumping by military aircraft.			
<b>13B. Support Requirements: Soil Resources</b>			
AC52: Any MUC boundary changes needed.	<b>Soil Issue 1:</b> Need for management zoning adjustments.	<b>N</b>	Outside the scope of this planning effort.
Pssgm: Focus on soils as a high priority mgt area. Identify and protect fragile soils and monitor soil impacts and soil component health.	<b>Soil issue 2:</b> Need for additional site- specific soil management and protection strategies.	<b>Y</b>	Addressing in the DT Wildlife Management Areas only.
AC115: Additional resources data is weak or not existing. Need to develop this data.			
AC22, AC10: Need standards for successful reclamation of various disturbances. Whose standards- Should we use SMARA standards?	<b>Soil issue 3:</b> Need for additional reclamation strategies.	<b>Y</b>	Addressed in the context of the DT Conservation strategy only.
Pssgm: Restore soils and vegetation at abandoned developments (mines, corrals, homesteads) and other denuded areas.			
<b>13C. Support Requirements: Water Resources</b>			
AC52: Any MUC boundary changes needed	<b>Water Issue 1:</b> Need for management zoning adjustments.	<b>N</b>	Outside the scope of this plan.
AC126, AC4: Look at need for additional water strategies for water quality, a critical aspect of desert ecosystem management.	<b>Water Issue 2:</b> Need for additional general strategies to protect water quality.	<b>N</b>	Outside the scope of this plan..
NePS: Consider regional development and federal project effects on water quality.			
NePS: Restore springs to make them suitable for wildlife.			
Pssgm: Stop additional spring modification.			

**BLM CDD  
NEMO CMP/FEIS, July 2002**

**5.0 Consultation and Coordination  
Table 5.1 NEMO Scoping Comments**

Comment	Element & Planning Issue	Within Scope	How Addressed
Psbv: Identify any/all lands protected under wetlands regulations (mining prospective).			
Pssgm: Manage wetlands to protect water quality.			
AC33: Develop long-term strategy to protect the Amargosa watershed.	<b>Water issue 3:</b> Need for additional site-specific strategies to protect water quality.	<b>Y</b>	Addressed in the ACEC proposal for Amargosa River.
Pssh: Address affects of water pumping (e.g. mining) on water in Amargosa River and work to limit pumping to an amount that will not compromise water flow (in DVNP).			
AC126, AC4, PSkr: Look at need for additional strategies with regard to water rights, adjudication, and water quality, other critical aspects of the desert ecosystem management.			
NePS: Consider regional development and fed project effects on water quality withdrawal.	<b>Water Issue 4:</b> Need for additional strategies to assure adequate water quantities for natural resources.	<b>Y</b>	Addressed for T&E species only. Otherwise outside the scope of this planning effort.
AC8: Do we need strategies to protect sensitive habitat from ground water withdrawal.			
AC62: Evaluate impacts of and plan appropriate strategies to deal with Impacts of water use on natural resources.			
AC3: Evaluate impacts of ground water depletion on habitat health. What is the threshold of draw down and what can be done to conserve water-dependent habitats?			
Pssgm: Increase monitoring to determine ground water pumping effects.			
Psrh: Protect my water rights on Hunter Mountain.			
<b>13D. Support Requirements: Research / Monitoring</b>			
AC36: Should we develop a comprehensive research strategy that speaks to on the ground issues?			
Pssgm: Develop an ecosystems based fire management policy.	<b>Research issue 1:</b> Need for research strategy plan in area.	<b>Y</b>	Addressed in DT Wildlife Management areas and other ACEC proposals.
Pssgm: Recommend a system for approving, supervising, and coordinating research activities in the planning area.			
Pssh: Coordinate research activities so that money is used effectively.
